Tail pipe Protection  
Heavy Duty Door Hinges  
Engine Side Protection  
Window Lifter for Driver Door  
Strobe Lights (Red & Blue)  
Siren  
Underbelly protection  
Radiator Protection

## ARMORING DESIGN

1. Cabin: The armoring is integrated inside the vehicle's cab and forms a complete self-supporting structure to avoid excessive stress on the vehicle's original structure, made of special steel comprising doors, a body firewall, a roof and others.
2. Bullet Proof Window Glasses and Wind Shield for protection against bullets and blast.
3. The battery and control module of the engine are protected to the same level as the opaque areas.
4. The interior Armor-frame provides overlap for the large-surface Armor components such as the door Armor-plates and the windows.
5. Upgraded suspension to cope with the additional weight due to armoring
6. Heavy-duty hinges with in-built doorstop. Hinge mounting points are reinforced both in the pillars and in the doors in a way that the armoring of the door is supported by the armoring of the pillar
7. The floor of the vehicle is designed to defeat DM 51 Grenade. Explosion proof blanket made of ballistic steel.
8. Fuel Tank Protection.
9. Run-Flat devices have been installed on all wheels. Forced drive running can be maintained even if a tire goes flat.
